

SnapServer – Drives Supported

NOTE: Desktop Drives: Not Supported with SnapServer Diskless Configurations

Variable Speed Drives (Green Drives): Not Supported with SnapServer Diskless Configurations

Do not mix drives with 512 and 4K sectors

Do not mix drives with different RPM's in XSD 40 or in the same column in XSR 120

(R = recommended, S = supported, NS = not supported)

S = supported drives will work with the appropriate system, but could result in a noisy desktop environment or reduced performance
