

## Instructions for 3TB RDX Media usage

### For USB3.0 and USB3+ Drives:

These drives work with the new 3TB media. It is recommended to download and install the newest RDX Utility software (v1.57).

### For USB2.0 Drives:

- Please download and install the newest RDX Utility software (v1.57)!
- Download and load the newest Firmware to your drive (Int: v30.57, Ext: v20.57)!

### For SATA Drives:

#### Be Awaras:

3TB media is not supported in ATA/IDE mode!

You need to change to AHCI mode in your BIOS settings.

Do not load the latest Firmware into your drive until you are sure, that your System is working in AHCI mode!

You won't be able to access the drive from your system if you have loaded the newest firmware without switching to AHCI-mode!

#### Instructions:

- Please switch your system to AHCI mode in your BIOS settings if not already done!
- Download and install the newest RDX Utility software (v1.57)!
- Download and load the newest Firmware to your drive (v00.83)!
