

# EOL SOFTWARE COMPATIBILITY MATRIX

For discontinued Tandberg Data products

**TANDBERG DATA**   
Securing your Information

The purpose of this document is to assist in deploying compatible hardware and software solutions  
For information regarding current products please consult the “Software Compatible Matrix”

## The information contained within this document assumes:

- All related hardware components have the most up to date firmware version
- Each third-party backup application is up to date with the most current build and available patches
- Operating systems are up to date with the latest build, patches and/or service pack(s)

## Limitations of this document:

- Tandberg Data provides technical support for in warranty hardware related issues only
- Tandberg Data does not provide technical support for third-party software. For all questions or problems regarding a software issue we recommend the software vendor be contacted for assistance
- This document does not contain information related to all builds or sub-versions of a particular operating system. For more specific questions regarding supported operating system versions we recommend referencing the appropriate software vendor's compatibility guide

## To use this document:

1. Use the bookmarks to browse and select hardware
2. Expand and select the intended software vendor/product
3. Scroll to locate the table for the correct software version
4. Find the specific configuration within the table
