

Protect your goods from insufficient packaging and damages in transit

Protect your goods against damage in transit

Ship in of „Bring In“

(Devices which are under warranty to be sent to Tandberg Data)

ARS return devices

(Devices which are returned under Advanced Replacement)

If you would like to choose the option to ship the unit yourself to Tandberg Data as a Repair, please note that TANDBERG Data is not responsible for any liability over badly (insufficiently) packed goods or damage to goods in transit.

Please use only TANDBERG original packaging. In case the original packaging is not available anymore, please make sure you protect the device as following:

- ✓ use a anti static bag
- ✓ protect your device against movement by using Styrofoam inlets or Styrofoam chips
- ✓ mark the package as “FRAGILE” or with “CARE”

Please bear in mind that the Shipper is liable for all damages in transport caused by insufficient packing.

Please do not hesitate to ask our TANDBERG Logistic Team for any further questions around shipping and packaging via logisticemea@tandberg.com

Steps for packing

1. Pack your device into a anti static bag...

2. Seal the antistatic bag that the device can not slip away...

3. Pack your device into the Styropor-Inlet

4. Close the Styropor-Inlet

5. Put the with antistatic and polystyrene wrapped device into the carton

6. Close the carton with sealing tape (Brown tape)

In order to prevent transport damage please make sure you apply the same packing instructions for all product returns.
